## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Pinchasik et al.-6,508,834.

Pinchasik (Fig. 2a-2c) discloses a self-expanding stent structured as recited in the claims. Please refer to the attached Fig. 2a of Pinchasik-'834.

Notice that the manner in which the stent is deployed or manufactured as recited in the claims are not given much patentability weight because the claims are claiming a device and not a method of using or manufacturing the device.

***Response to Arguments***

Applicant's arguments filed 6/26/2007 have been fully considered but they are not persuasive.

The Applicant argued that Pinchasik-'834 cannot be considered as self-expanding anchor section as recited in claims 1 and 12 and refer to the specification to distinguish the claimed invention and Pinchasik-'834 reference. However, the specification is referred to as a support for the claims but cannot be read into the claims. If the specification does not explicitly restrict the meaning of a self-expanding as a nitinol stent, then the term "self-expanding" should be interpreted as any metal stent, such as stainless steel stent, which inherently has some elasticity or shape-memory characteristic, and therefore will also somewhat self-expand when released from a compressed state.

Even a balloon is required to fully expand a stainless steel stent, like the Pinchasik-'834 stent, one of ordinary skill in the art recognizes that when a stainless steel stent is released from a compressed configuration, the stent will self-expand to a larger configuration than the compressed configuration. Accordingly, Pinchasik-'834's anchor sections can be considered as self-expanding anchor sections.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3773

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
